

# EGTI INDY

## Manufacturing Training Program

### EGTI

Erskine Green Training Institute (EGTI) offers postsecondary vocational training designed for individuals with disabilities, aged 18 and older. Most EGTI students received special education services in school and exited high school with a diploma, GED, or certificate of completion.

Since its founding in 2016, EGTI graduates have enjoyed tremendous success. Over 80% of EGTI graduates have secured employment in communities throughout Indiana.

### ALLISON TRANSMISSION

EGTI students training at Allison Transmission complete a 5-week program through Conexus Indiana's Catapult program.

Students engage in 140-160 hours of hands-on and interactive classroom training in Indiana's most important industry, advanced manufacturing, and leave the program with a certificate in Catapult Advanced Manufacturing Standardized Work Training.
